RADNA GRUPA ZA INTERVENTNU KARDIOLOGIJU
WORKING GROUP FOR INTERVENTIONAL CARDIOLOGY

Poštovane koleginice i kolege, dragi prijatelji,

Velika čast i zadovoljstvo nam je da vas pozovemo na predstojeći osmi Simpozijum mladih interventnih kardiologa Srbije „Meet the Future of Serbian Interventional Cardiology”, koji će se održati 6. i 7. decembra 2024. godine u Amfiteatru Instituta za kardiovaskularne bolesti Vojvodine.

Ovogodišnji Simpozijum će biti posvećen hroničnom koronarnom sindromu, aktuelnim smernicama, indikacijama za revaskularizaciju, kao i tretmanu kompleksnih koronarnih lezija.

Nakon uvodnih predavanja, održaće se sesija bazirana na rešavanju kompleksnih procedura, uz podršku i diskusiju kako domaćih, tako i inostranih eksperata.

Planiran je uživo prenos procedure iz kateterizacione laboratorije posvećen tretmanu bifurkacione lezije.

Tokom održavanja Simpozijuma, razgovaraće se o lečenju kardiogenog šoka, aktuelnim smernicama i eskalaciji mehaničke cirkulatorne potpore.

Neizostavni deo kongresa čine teme o tretmanu struktturnih bolesti srca, uz uživo prenos procedure iz kateterizacione laboratorije.

Pozivamo vas da učestvujete na predstojećem Simpozijumu i omogućite najviši kvalitet na obostrano zadovoljstvo.

Srdačno vas pozdravljamo,

Mr sci. med. Dragan Debeljački

prof. dr Milovan Petrović
prof. dr Aleksandar Redžek

Dear colleagues and friends,

It is our great honor and pleasure to invite you to the upcoming 8th Symposium of Young Interventional Cardiologists of Serbia, "Meet the Future of Serbian Interventional Cardiology," which will take place on December 6th and 7th, 2024, in the Amphitheater of the Institute for Cardiovascular Diseases of Vojvodina.

This year's Symposium will focus on chronic coronary syndrome, current guidelines, indications for revascularization, and the treatment of complex coronary lesions. Following the introductory lectures, there will be a session dedicated to solving complex procedures, with support and discussion from both domestic and international experts.

Live procedure is planned from the catheterization laboratory, dedicated to the treatment of bifurcation lesion.

During the Symposium, discussions will cover the treatment of cardiogenic shock, current guidelines, and the escalation of mechanical circulatory support.

An integral part of the conference includes topics on the treatment of structural heart diseases, with a live transmission of procedures from the catheterization laboratory.

We invite you to participate in the upcoming Symposium and contribute to achieving the highest quality, to the mutual satisfaction of all.

Mr sci. med. Dragan Debeljački

prof. dr Milovan Petrović

prof. dr Aleksandar Redžek

Organizatori

**Institut za kardiovaskularne bolesti Vojvodine, Sremska Kamenica
Medicinski fakultet, Novi Sad**

Simpozijum „8th Meet the Future of Serbian Interventional Cardiology – Osmi simpozijum mlađih interventnih kardiologa Srbije“ akreditovan je kao nacionalni kongres sa međunarodnim učešćem, odlukom Zdravstvenog saveta Srbije broj: 153-02-00440 /2024-01, 2024. godine, pod evidencionim brojem A-1-1987/24 i nosi 9 bodova za predavače i 5 bodova za slušaoce.

Mesto i vreme održavanja: Institut za kardiovaskularne bolesti Vojvodine, Sremska Kamenica, 6. i 7. decembar 2024. godine.

Organizers

**Institute for Cardiovascular Diseases of Vojvodina, Sremska Kamenica
Faculty of Medicine, Novi Sad**

The “8th Meet the Future of Serbian Interventional Cardiology” Symposium is accredited as a national congress with international participation by the decision of the Health Council of Serbia, number 153-02-00440 /2024-01 from under the registration number A-1-1987/24 and carries 9 points for lecturers and 5 points for listeners.

Venue: Institute of Cardiovascular Diseases,

Vojvodina - Sremska Kamenica, Serbia

Date: December 6-7, 2024

IMAGING MATTERS

2024 ESC GUIDELINES FOR CCS

IT'S TIME TO RAISE THE PCI STANDARD.
ANGIOGRAPHY IS NOT ENOUGH.

THE USE OF OCT IS NOW RECOMMENDED WHEN PERFORMING COMPLEX PCI¹

RECOMMENDATIONS	CLASS	LEVEL
ASSESSMENT OF PROCEDURAL RISKS AND POST-PROCEDURAL OUTCOMES		
Intracoronary imaging guidance by IVUS or OCT is recommended when performing PCI on anatomically complex lesions, in particular left main stem, true bifurcations and long lesions ¹	I	A

ABBOTT OCT CLINICAL EVIDENCE IS THE FOUNDATION FOR ESC GUIDELINE RECOMMENDATIONS:

ILUMIEN IV

OCT-guided PCI significantly reduced stent thrombosis (ST)²

OCTOBER

OCT-guided PCI of complex bifurcation lesions is superior to angiography-guided PCI for major cardiac adverse events (MACE) at 2 years³

64% LOWER ST²

28% LOWER MACE³

RENOVATE-COMPLEX PCI

IVI led to lower risk of composite death from cardiac cause, target vessel-related MR or clinically driven target-vessel revascularization than angiography-guided PCI by 2 years⁴

37% REDUCTION IN TV-MI / CARDIAC MORTALITY⁴

Powered by AI, Ultreon™ 2.0 Software instantly provides you with actionable OCT and angiographic insights, enabling PCI procedural efficiencies and optimal outcome⁵⁻⁹

GO BEYOND THE ANGIOGRAM

With Full Physiology^{1,2}

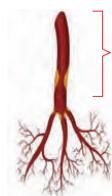

ANGIOGRAPHY DOESN'T TELL YOU THE FULL STORY.
ASSESSING FULL PHYSIOLOGY LEADS TO BETTER OUTCOMES.

40 TO 60%

of all elective patients undergoing angiography suffer from ischemia and no obstructive coronary artery disease (INOCA)³⁻⁴

UP TO 50%

of INOCA patients might have recurrent angina due to CMD⁴

FFR: Fractional Flow Reserve
RFR: Resting Full-Cycle Ratio

IMR: Index of Microcirculatory Resistance

CFR: Coronary Flow Reserve

ESC GUIDELINES 2024 REFLECT THE IMPORTANCE OF MICROVASCULAR ASSESSMENT AND PREVALENCE OF INOCA/ANOCA⁵

CCS includes not only epicardial but small vessels of the heart or microcirculation.⁵

ANOCA/INOCA is a prevalent factor on clinical spectrum of CCS⁵

Updated ESC guidelines for microvascular assessment

RECOMMENDATIONS	CLASS	LEVEL
Invasive assessment of CFR and/or IMR is recommended to diagnose obstructive CAD or ANOCA/INOCA in patients with an uncertain diagnosis on non-invasive testing ⁵	I	B

Guidelines for epicardial assessment

RECOMMENDATIONS	CLASS	LEVEL
During ICA, selective assessment of functional severity of intermediate diameter stenoses is recommended to guide the decision to revascularize, using FFR or iFR ⁵	I	A

The PressureWire™ X Guidewire used with the CoroFlow™ Cardiovascular System is the only solution to assess both epicardial arteries and the microvasculature.^{1,2,6-8}

This easy to use solution provides a full physiology assessment to provide a clear diagnosis and optimize patient treatment.⁷
